Regd. No. - SO012687 of 1972 - 1973

To whom it may concern

This is to certify that Mr. Debanil Dhar is known to me since he joined my laboratory in September 2021, as a research intern in a project titled "Deciphering the role of CUEDC2 in the molecular cross-talk between aneuploidy and receptor status in breast cancer". Since his joining this division, I have always noticed his involvement and patience in understanding scientific nuances. Coming from a Microbiology background, he indeed worked hard to make himself competent in the field of Cancer Cell and Molecular Biology. With times, he received hands-on training in RNA isolation, cDNA preparation, qualitative and quantitative PCR, agarose gel electrophoresis, SDS-PAGE and fluorescence-*in-situ*-hybridization. Indeed, his involvement is nothing less than that of a PhD student. Moreover, he is hard-working and spends long hours in the laboratory including the holidays. I found Debanil as an enthusiastic student who always strives for new knowledge. In my opinion, he promises to be an excellent researcher in his field in the coming years. I strongly recommend him for the candidature for the Research Fellowship Award from DSTBT.

Somsubhra Nath, PhD

Scientist, Dept. of Basic and Translational Research

Technical Director, Molecular Diagnostics Laboratory
